Responses	Human-graded responses	Active criteria with selected candidates

Alignment based on 5 human-graded responses; 1 ungraded. Human grades are optional for the remaining outputs and are distinct from unknown evaluator verdicts.

Prompt and model provenance

```
Perform named entity recognition on this tweet:

"Loved the Apple event in Cupertino. Tim Cook introduced
the Vision Pro while #AppleEvent was trending."

Identify at most three well-known named entities explicitly
mentioned in the tweet. Each should be identifiable in a
reference source such as Wikipedia.

Return a Markdown bulleted list in this format:
- Entity: One-sentence description

Do not extract hashtags as entities. Do not invent entities.
```

Coverage is the fraction of human-bad outputs flagged. False failure rate is the fraction of human-good outputs flagged. Alignment is their harmonic combination with 1 – false failure rate. n/a means the rate cannot be determined from this snapshot.

Responses and human feedback

Response 1 Good

```
- Apple: An American technology company known for products such as the iPhone and Mac.
- Cupertino: A city in California where Apple is headquartered.
- Tim Cook: The chief executive officer of Apple.
